

# Brian Cavanagh

*building design*

## Testimonials

We are so happy we got Brian on board to help us figure out fitting an additional Bedroom, Walk in robe, Ensuite and sort out the Laundry in our home. We had very limited space to work with and we had trouble making it all work. Brian found a way to fit everything in – with multiple options! He even took into account of our request for working with feng shui. Brian was full of ideas and helped us think outside the box whilst adhering to our requirements. Brian was professional, fast, effective and open minded. He is a real pleasure to deal with. We would highly recommend Brian's Building Design services to anyone planning a renovation.

Cheers Tea and Adam 😊  
Maroochydore

We are indeed lucky to have found Brian to work on our renovation/extension design. Our initial discussion with Brian focussed on the way we live, our future needs and weaknesses with the current floor plan.

Brian really listened and within weeks presented us with a series of concept drawings that successfully encapsulated our wishes, giving us more than we expected. We selected our preferred concept drawings which Brian then incorporated into plans and elevations - exactly as we wanted. This process has begun the transformation of a modest 1980's dwelling into a contemporary coastal home.

Thanks Brian, we look forward to working with you bringing our plans to fruition.
